

Japanese boutique game studio G.rev makes its long-awaited debut on Steam with Strania!

This throwback robot shoot'em up is an ode to the nostalgia of 1980s arcade games. Players will need to make strategic decisions quickly in this fast-paced, exhilarating shooter. Accompanied by a catchy soundtrack and featuring dramatic visual effects, G.rev proudly presents Strania as its first title on the Steam platform.

The Steam version of Strania includes the "Side Vower" DLC that was released separately for home consoles. Play as a pilot in the Vower camp that seeks to reclaim the land they hold sacred.

STORY

The full game story is available on the game's website. <http://www.grev.co.jp/str/story.html>

The paths of two advanced civilizations cross as the people of Strania attempt to defend its planet from the approaching Vover army. Suited in powerful mecha that may be armed with a variety of weapons, the Stranian special task force, the Stella Machina, set out on a preemptive strike against the artificial beings. In order to give their home planet a chance to overcome the oppressors, the Stella Machina must destroy *Gunrock*, the Vover's massive particle weapon, and create an opening for the fleet to attack the Vover base settling on the frontline.

KEY FEATURES

* **Inspired by classic arcade shooters from the 1980s:** Noted boutique game developer G.rev's throwback robot shoot 'em up is a tribute to old school action shooters from the days when arcades still ruled the gaming scene. A 3D-graphics based vertical shooter, gamers will face relentless waves of enemies and bullets flying from every direction. Infiltrate towering defensive structures and duel with monolithic robots in this fast paced shmup set above a backdrop of retro graphics.

* **Guns and swords do mix:** As a member of the elite Stella Machina, gamers pilot a high-powered mecha able to equip a lethal arsenal of weapons. Choose from a long range, destructive laser, explosive rockets, a reflective shot and more. Or, take the battle up close and pick up a couple of swords to slash your way through the fields of robotic invaders.

SIDE VOVER

A tale does not become an epic without multiple twists and storylines; the epic of Strania is not merely a one-sided verse detailing the Stranian forces' attempt to defend the planet they call home. Select the Vover camp in the main menu to assume the role of the intergalactic travelers who have come to Strania with a mission – to recapture the land that they hold sacred.

Sold separately as DLC for home consoles, Side Vover is included in the Steam version of Strania! You'll work your way into the heart of the planet as you fight through newly arranged stages each capped with a Stranian boss. Break through Stranian defenses, duel with the elite Stella Machina, and lead the Vover army to fulfill their destiny.
